

# OBSERVANCE OF INTERNATIONAL DAY FOR THE CONSERVATION OF MANGROVE ECOSYSTEM, 2023 BY DEPARTMENT OF BOTANY ON 26.7.23.

Observance of international day for the conservation of Mangrove Ecosystem, 2023” was held in Department of Botany on 26 July 2023. About 10 students from semester to Botany Honours participated on that day. The students discussed on the problems the Mangrove vegetations are facing due to climate change, deforestation due to agriculture and aquaculture, urban development and harvesting. They broadly discussed the points on how the mangroves are threatened by tourism industry and pollution from runoff fertilizers, pesticides and improper disposal of wastes. Destruction of the Mangrove Ecosystem were also discussed. The students were evaluated by the teachers on the basis of their contents of presentation and deliberation of talks.
