

SAPLING PLANTATION PROGRAMME ORGANIZED BY GEOGRAPHY DEPARTMENT

Department of Geography organized a programme of sapling plantation along with IQAC on 4th October, 2023. All the faculty members as well as students from various semesters took huge initiative in this respect. Dr. Saswati Nayak, Associate Professor of Department of Geography, brought all the saplings for plantation. Various species like Pink Tabebuia and Variegated Aralia were planted in the college ground by the faculty members and students of the department. Respected Principal Madam Dr. Maitreyi Ray Kanjilal and Dr. Sumallya Karmakar, co-ordinator of IQAC actively participated to make this programme a successful one. Madam planted one such species while another one was planted by our IQAC co-ordinator. All the students helped them in planting. Teachers from other departments of the college also participated in this programme with great enthusiasm. This is a small yet significant step from the Department of Geography to make our environment more ecologically sustainable.
