VICTORIA INSTITUTION (COLLEGE)

DEPARTMENT OF GEOGRAPHY

2021-2022 LESSON PLAN: HONOURS

Semester	Programme	Course and Name of the	Topic	Teacher	No. Of hours
		Paper			nours
First	Hons	CC – 1 Geotectonics and Geomorphology	Earth's tectonic and structural evolution with reference to geological time scale.	PG	3
		(Theory)	Earth's interior with special reference to seismology. Isostasy: Models of Airy, Pratt, and their applicability.	PG	3
		Plate Tectonics as a unified theory of global tectonics: process and landfroms at plate margins and hotspots.	PG	10	
		Folds and Faults- origin and types.	PG	4	
		Degradational processes: Weathering and resultant landforms.	SN	2.5	
			Degradational processes: mass wasting, and resultant landforms.	KB	2.5
		Processes of entrainment, transportation, and deposition by different geomorphic agents. Role of humans in landfrom development.	KB	4	
		Development of river network and landforms on uniclinal and folded structures. Surface expression of faults.	КВ	7	
			Development of river network and landforms on granites, basalts and limestones.	KB	4
			Coastal processes and landfroms.	SN	4
			Glacial and glacio-fluvial processes and landfroms.	KB	4

		Aeolian and fluvio-	KB	4
		aeolian processes and	ILD	'
		landfroms.		
		Role of time in	PD	8
		geomorphology: Schumn	12	Ü
		and Lichty's model.		
		Models on landscape		
		evolution: Views of		
		Davis, Penk, and Hack.		
		Significance of systems		
		approach.		
	CC - 1	Measurement of dip and	KB	6
	Geotectonics	strike using clinometer.		·
	and	Megascopic identification	PG	14
	Geomorphology	of (a) mineral		
	Lab	samples:Bauxite, calcite,		
	(Practical)	chalcopyrite,		
		feldspar,galena,gypsum,		
		hematite, magnetite, mica,		
		quartz, talc,tourmaline;		
		and (b) rock samples:		
		Granite, basalt, dolerite,		
		laterite,limestone,shale,		
		sandstone, conglomerate,		
		slate,phyllite,schist,gneiss,		
		quartzite,marble.		
		Extraction and	PD	15
		interpretation of		
		geomorphic information		
		1:50K topographical maps		
		of plateau region:		
		Delineation of drainage		
		basins. Construction of		
		relative relief map,		
		drainage density map		
		(c.5'*5').		
		Construction of relief	PG	5
		profiles (superimposed,		
		projected, composite).		
		Construction of slope map	SN	15
		(Wentworth's method),		
		stream ordering (Strahler),		
		and bifurcation ratio on a		
		drainage basin (c.5'*5').		
		Construction of	KB	5
		hypsometric curve and		
		derivation of hypsometric		
		integer of a drainage basin		
		(c.5'*5')from survey of		
I		India 1:50K		

	Topographical maps of	
	plateau region.	

Semester	Programme	Course and Name of the Paper	Topic	Teacher	No. Of hours
First	Hons	CC – 2 Cartographic	Maps: Components and classification.	PG	4
		Techniques (Theory)	Concept and application of scales: Plain, comparative, diagonal, and vernier.	PD	8
			Coordinate systems: Polar and rectangular.	SN	6
			Concept of generating globe.	SN	2
			Grids: Angular and linear systems of measurement.	SN	5
			Bearing: Magneting and true, whole-circle and reduced.	PD	5
			Concept of geoid and spheroid with special reference to Everest and WGS-84.	SN	4
			Map projections: Classification, properties and uses.	SN	8
			Concept and significance of UTM projection.	SN	2
			Representation of data using dots, spheres and divided proportional circles.	KB	5
		Representation of data using isopleth, choropleth, and chorochromatic maps.	PG	5	
		Survey of India topographical maps: Reference scheme of open and old series. Information on the margin of maps.	PG	6	

CC – 2	Graphical	PD	16
Cartographic	construction of		
Techniques	scales: Plain,		
Lab	comparative,		
(Practical)	diagonal, and vernier.		
	Construction of	SN	12
	projections : Polar		
	Zenithal		
	Stereographic, Simple		
	conic with one		
	standard parallel,		
	Bonne's.		
	Construction of	KB	8
	projections:		
	Cylindrical Equal		
	Area, and Mercator's.		
	Thematic maps;	KB	12
	Proportional squares,		
	Pie diagrams with		
	proportional circles,		
	dots and sphere.		
	Thematic maps:	PG	12
	Choropleth, isopleth,		
	and chorochromatic		
	maps.		

Semester	Programme	Course and	Topic	Teacher	No. Of

		Paper			
Second	Hons	CC – 3	Nature, scope and	PG	4
		Human	recent trends. Elements		
		Geography	of human geography.		
		(Theory)	Approaches to	PG	6
		-	Human Geography:		
			resource, locational,		
			landscape,		
			environment.		
			Concept and	PD	5
			classification of race.		
			Ethnicity.		
			Space, society and	PD	5
			cultural regions		
			(language and		
			religion).		
			Evolution of human	KB	6
			societies: Hunting		
			and food gathering,		

	Т	1 , 1 1	Т	
		pastoral nomadism,		
		subsistence farming		
		and industrial		
		society.		
		Human adaptation to	KB	4
		environment: Case		
		studies of Eskimos,		
		Masai and Maori.		
		Population growth	PD	5
		and distribution,		
		composition,		
		demographic		
		transition.		
		Populaion-resource	PD	5
		regions(Akerman).	12	
		Development-	PG	5
		environment conflict.	10	3
			CNI	<u> </u>
		Types and patterns of	SN	5
		rural settlements.	CNI	
		Rural house types in	SN	5
		India.		
		Morphology and	PG	5
		hierarchy of urban		
		settlements.		
	CC - 3	Spatial variations in	PG	12
	Human	continent or country		
	Geography	level religious		
	Lab	compositions by		
	(Practical)	divided proportional		
	,	circles.		
		Measuring arithmetic	PG	15
		growth rate of		
		population		
		comparing two		
		decadal datasets.		
		Types of Age-Sex	PD	20
		pyramids	110	20
		(progressive,		
		regressive,		
		intermediate and		
		stationary): Graphical		
		representation and		
		analysis.		
		Nearest neighbor	PG	13
		analysis from survey		
		of India 1:50k		
		topographical		
		maps(5'x5').		

Semester	Programme	Course and Name of the Paper	Topic	Teacher	No. Of hours
Second	Hons	CC – 4 Thematic Mapping and Surveying	Concepts of rounding, scientific notation. Logarithm and anti logarithm. Natural and log scales.	SN	4
		(Theory)	Concept of diagrammatic representation of data.	PG	2
			Preparation and interpretation of geological maps.	PD	5
			Preparation and interpretation of weather maps.	PG	5
			Preparation and interpretation of land use land cover maps.	KB	5
			Preparation and interpretation of socio-economic maps.	PG	5
		Principle national agencies producing thematic maps in India: NATMO ,GSI, NBSSLUP, NHO,NRSC/ Bhuvan , etc.	PD	5	
			Basic concepts of surveying and survey equipments: Prismatic compass.	SN	5
		Basic concepts of surveying and survey equipments: Dumpy level.	SN	7	
		Basic concepts of surveying and survey equipments: Theodolite	KB	7	
			Basic concepts of surveying and survey equipments: Abney level.	КВ	5
			Basic concepts of surveying and survey	KB	5

	equipments: Laser		
	distance measurer.		
CC - 4	Traverse survey using	SN	10
Thematic	prismatic compass.		
Mapping	Profile survey using	SN	12
and	dumpy level.		
Surveying	Height determination	KB	18
(Practical)	of base accessible and		
	inaccessible (same		
	vertical plane method)		
	objects by theodolite.		
	Interpretation of	PD	20
	geological maps with		
	uniclinal structure,		
	folds, unconformity		
	and intrusions		

Semester	Program me	Course and Name of the Paper	Topic	Teacher	No. Of hours
Third	Hons	CC – 5 Climatology	Nature, Composition and layering of the atmosphere.	PG	4
	(Theory)	Insolation: Controlling factors. Heat budget of the atmosphere.	PG	6	
			Temperature: Horizontal and vertical distribution. Inversion of temperature: types, causes and consequences.	PG	6
			Overview of climate change: Greenhouse effect. Formation, depletion and significance of the ozone layer.	PG	4
			Condensation: Process and forms. Mechanism of precipitation: Bergeron-Findeisen theory, collision and coalescence. Forms of precipitation.	PG	6
			Air mass: Typology, origin, characteristics and modification.	PG	4
			Fronts: Warm and cold, frontogenesis and frontolysis.	PG	5

	Weather: Stability and instability, barotropic and baroclinic conditions.	PG	5
	Circulation in the atmosphere: Planetary winds, jet streams, index cycle.	PG	5
	Atmospheric disturbances: Tropical and mid-latitude cyclones, thunderstorms.	PG	5
	Monsoon circulation and mechanism with reference to India.	PG	5
	Climatic classification after Thornthwaite (1955) and Oliver.	PD	5
CC - 5 Climatology Lab (Practical)	Measurement of weather elements using analogue instruments: Mean daily temperature, air pressure, relative humidity, rainfall.	PG	15
	Interpretation of a daily weather map of India (any two): Pre-Monsoon, Monsoon and Post-Monsoon.	PG	20
	Construction and interpretation of hythergraph and climograph (G. Taylor).	PG	15
	Construction and interpretation of wind rose.	PG	10
CC – 6 Hydrology and Oceanography	Systems approach in hydrology. Global hydrological cycle: Its physical and biological role.	SN	5
(Theory)	Run off: Controlling factors. Infiltration and evapotranspiration. Run off cycle.	KB	5
	Drainage basin as a hydrological unit. Principles of water harvesting and watershed management.	KB	5
	Groundwater: Occurrence and storage. Factors controlling recharge, discharge and movement.	SN	5
	Major relief features of the ocean floor: Characteristics and origin according to plate tectonics.	PD	6

	Physical and chemical properties of ocean water.	PD	4
	Water mass, T-S diagram	KB	4
	Air-Sea interactions, ocean circulation, wave and tide.	KB	8
	Ocean temperature and salinity: Distribution and determinants.	PD	4
	Coral reefs: Formation, classification and threats.	KB	5
	Marine resources: Classification and sustainable utilisation.	PD	4
	Sea level change: Types and causes.	KB	5
CC – 6 Hydrology	Construction and interpretation of rating curves.	PD	10
and Oceanography Lab (Practical)	Construction and interpretation of hydrographs and unit hydrographs.	PD	15
(Fractical)	Monthly rainfall dispersion diagram (Quartile method), Climatic water budget and Ergograph.	KB	25
	Construction of Theissen polygon from precipitation data.	KB	10
CC – 7 Statistical	Importance and significance of statistics in Geography.	SN	4
Methods in Geography (Theory)	Discrete and continuous data, population and samples, scales of measurement (nominal, ordinal, interval and ratio).	SN	5
	Sources of geographical data for statistical analysis.	SN	4
	Collection of data and formation of statistical tables.	SN	5
	Sampling: Need, types and significance and methods of random sampling.	SN	4
	Theoretical distribution: frequency, cumulative frequency, normal and probability.	SN	6
	Central tendency: Mean, median, mode, partition values.	SN	6

	Measures of dispersion range, mean deviation, standard deviation, coefficient of variation.	SN	6
	Association and correlation: Rank correlation, product moment correlation.	PD	5
	Regression: Linear and non-linear.	PD	5
	Time series analysis: Moving average.	SN	5
	Hypothesis testing: Chi- squared and T-test.	PD	5
CC – 7 Statistical Methods in Geography Lab (Practical)	Construction of data matrix with each row representing an areal unit (districts/blocks/mouzas/towns) and corresponding columns of relevant attributes.	SN	15
	Based on the above, a frequency table, measures of central tendency and dispersion would be computed and interpreted using histogram and frequency curve.	SN	15
	From the data matrix, a sample set (20%) would be drawn using random, systematic and stratified methods of sampling and the samples would be located on a map with an explanation of the methods used.	SN	15
	Based on of the sample set and using two relevant attributes, a scatter diagram and linear regression line would be plotted and residual from regression would be mapped with a short interpretation.	PD	15
SEC - A-2 Tourism Management (Theory)	Scope and Nature: Concepts and issues, tourism, recreation and leisure inter-relations; Factors influencing tourism, Types of tourism: Ecotourism, cultural tourism, adventure tourism, medical tourism, pilgrimage, international, national.	PD	10

Use of information on factors (Historical, natural, socio-cultural and economic; motivating factors for pilgrimages) to plan destination marketing; tourism products; niche tourism planning.	SN	5
Tourism impact assessment, Sustainable tourism, Information Technology and Tourism, Tour operations planning and guiding.	PG	8
Increasing Global tourism; Tourism in India: Tourism infrastructure, access, planning for different budgets for case study sites of Western Himalayas, Goa, Chilka/Vembanad, Jaipur.	КВ	7

Semester	Programm e	Course and Name of the Paper	Торіс	Teacher	No. Of hours
Fourth	Hons	CC - 8 Economic	Meaning and approaches to economic geography	PD	4
		Geography (Theory)	Concepts in economic geography: Goods and services, production, exchange, and consumption.	PD	6
			Concept of economic man. Theories of choices.	PD	6
			Economic distance and transport costs.	PD	4
			Concept and classification of economic activities.	PD	4
			Factors affecting location of economic activity with special reference to agriculture (von Thünen), and industry (Weber).	SN	6
			Primary activities: Agriculture, forestry, fishing, and mining.	KB	6
			Secondary activities: Classification of manufacturing, concept of manufacturing regions, special economic zones and technology parks.	PD	6
			Tertiary activities: Transport, trade and services.	PD	6

	Transnational sea-routes, railways and highways with reference to India.	PD	4
	International trade and economic blocs.	PD	4
	WTO and BRICS: Evolution, structure and functions.	PD	4
CC - 8 Economic	Choropleth mapping of state-wise variation in GDP.	PD	10
Geography Lab (Practical)	State-wise variation in occupational structure by proportional divided circles.	PD	1:
	Time series analysis of industrial production (India and West Bengal).	KB	20
	Transport network analysis by detour index and shortest path analysis.	PD	1:
CC - 9 Regional	Regions: Concept, types, and delineation.	PG	4
Planning and Development	Regional Planning: Types, principles, objectives, tools and techniques.	PG	6
(Theory)	Regional planning and multi-level planning in India.	PG	6
	Concept of metropolitan area and urban agglomeration.	PG	4
	Concept of growth and development, growth versus development.	PG	4
	Indicators of development: Economic, demographic, and environmental.	PG	6
	Human development: Concept and measurement.	SN	4
	Theories and models for regional development: Cumulative causation (Myrdal).	KB	4
	Models and theories in regional development: Stages of development (Rostow), growth pole model (Perroux).	PG	6
	Underdevelopment: Concept and causes .	SN	4
	Regional development in India: Disparity and diversity.	PG	5
	Need and measures for balanced development in India.	PG	5

CC - 9 Regional	Delineation of formal regions by weighted index method.	PG	15
Planning and Development	Delineation of functional regions by breaking point analysis .	PD	15
Lab (Practical)	Measurement of inequality by location quotient.	PG	15
(Tractical)	Measuring regional disparity by Sopher index.	PG	15
CC - 10	Factors of soil formation.	KB	3
Soil and Biogeography (Theory)	Definition and significance of soil properties: Texture, structure, and moisture.	KB	5
	Definition and significance of soil properties: pH, organic matter, and NPK.	KB	5
	Soil profile. Origin and profile characteristics of lateritic, podsol and chernozem soils.	KB	6
	Soil erosion and degradation: Factors, processes and management measures. Humans as active agents of soil transformation.	KB	5
	Principles of soil classification: Genetic and USDA. Concept of land capability and its classification.	KB	6
	Concepts of biosphere, ecosystem, biome, ecotone, community and ecology.	SN	5
	Concepts of trophic structure, food chain and food web. Energy flow in ecosystems.	SN	5
	Classification of world biomes (Whittaker). Geographical extent and characteristics of tropical rain forest, savanna, hot desert, taiga and coral reef biomes.	SN	8
	Bio-geochemical cycles with special reference to carbon dioxide and nitrogen.	SN	4
	Deforestation: Causes, consequences and management.	SN	4
	Biodiversity: Definition, types, threats and conservation measures.	SN	4
CC - 10 Soil and	Determination of soil reaction (pH) and salinity using field kit.	КВ	15

Biogeography Lab	Determination of soil type by ternary diagram textural plotting .	KB	15
(Practical)	Plant species diversity determination by matrix method.	SN	10
	Time series analysis of biogeography data.	SN	20
SEC-B-3 Rural Development	Rural Development: Concept, basic elements, measures of level of rural development.	PD	5
(Theory)	Paradigms of rural development: Gandhian approach to rural development Lewis model of economic development, 'big push' theory of development, Myrdal's model of 'spread and backwash effects'.	SN	10
	Area based approach to rural development: Drought prone area programmes, PMGSY, SJSY, MNREGA, Jan Dhan Yojana.	KB	10
	Rural Governance: Panchayati Raj System and rural development policies and Programmes in India.	PG	5

	fieldwork		
	Field techniques and tools:	SN	5
	Observation (participant,		
	non-participant),		
	questionnaires (open, closed,		
	structured, non-structured).		
	Interview		
	Field techniques and tools:	SN	5
	Landscape survey using		
	transects and quadrants,		
	constructing a sketch, photo		
	and video recording		
	Positioning and collection of	SN	4
	samples. Preparation of		
	inventory from field data		
	Post - field tabulation,	SN	5
	processing and analysis of		-
	quantitative and qualitative		
	data		
	Fieldwork: Logistics and	SN	5
	handling of emergencies	211	
CC -11	Each student will prepare a	KB	
Research	report based on primary data	112	60
Methodolo	collected from field survey		00
gy and	and secondary data collected		
Fieldwork	from different sources.		
Lab	Students will select either one		
(Practical)	rural area (mouza) or an		
(Tractical)	urban area (municipal ward)		
	for the study, with the		
	primary objective of		
	evaluating the relation		
	between physical and cultural		
	landscape.		
	A specific problem or a		
	special feature should be		
	identified based on which, the		
	· ·		
	study area will be selected.		
	The field work and post-field		
	work will include:		
	work will include.		
	a. Collection of primary data		
	on physical aspects (relief		
	and soil) of the study area.		
	Students should use survey		
	instruments like prismatic		
	-		
	compass, dumpy level,		

Abney level or clinometer wherever necessary.

- b. Collection of soil samples from different land cover land use regions of the study area for determining pH and NPK values with help of a soil kit. c. Collection of socio economic data, at the household level (with the help of a questionnaire) in the selected study area.
- d. Plot to plot land use survey for preparation of a land use map, covering whole or part of the selected area.
- e. Visit to different organisations and departments for collection of secondary data.
- f. Any other survey relevant to the objective of the study.

The Field Report should contain the following sections (a–e).

- a. Introduction: Study area extent and space relations, reasons for selection of the study area on the basis of a specific problem or special feature, objectives, methods of data collection, analyses and presentation, sources of information, etc.
- b. Physical aspects: Lithology and geological structure, relief, slope, drainage, climate, soil, vegetation, environmental issues, proneness to natural hazards, etc. c. Socioeconomic aspects:
- i. Population attributes: Number, sex ratio, literacy, occupational structure, ethnic and religious composition, language, per capita income, etc.

	ii. Settlement characteristics: Number of houses, building materials, number and size of rooms, amenities, etc. iii. Agriculture: General land use, crop-combination, use of fertiliser and irrigational facilities, production and marketing etc. iv. Other economic activities: Fishing, horticulture, brick-making, household and other industries, etc. d. Conclusions: Relation between physical and cultural landscape. Evaluation of problems and prospects. General recommendations. e. Bibliography. The students will prepare (i) a chorochromatic land use land cover map on the basis of plot to plot survey; (ii) a profile of suitable length, surveyed and plotted, with different land use land cover superimposed on it. All sections of the report should contain relevant maps, diagrams and photographs using primary and secondary data, clearly citing sources.		
CC –12 Remote Sensing, GIS and GNSS	Principles of Remote Sensing (RS): Types of RS satellites and sensors	PD	5
(Theory)	Sensor resolutions and their applications with reference to IRS and Landsat missions	PD	5
	Image referencing schemes and acquisition procedure of free geospatial data from NRSC / Bhuvan and USGS	PD	5

Preparation of False Colour Composites from IRS LISS-3 and Landsat TM / OLI data.	PD	5
Principles of image interpretation. Preparation of inventories of landuse land cover (LULC) features from satellite images	PD	5
Acquisition and utilisation of free Digital Elevation Model data: CartoDEM, SRTM and ALOS	PD	5
GIS data structures types: Spatial and non-spatial, raster and vector	КВ	5
Principles of preparing attribute tables, data manipulation, and overlay analysis	KB	5
Principles and significance of buffer preparation	KB	4
Principles and significance of overlay analysis	KB	5
Principles of GNSS positioning and waypoint collection	PD	5

	Principles of transferring of GNSS waypoints to GIS. Area and length calculations from GNSS data	PD	5
CC –12 Remote Sensing, GIS and GNSS Lab (Practical)	Image georeferencing and enhancement. Preparation of reflectance libraries of LULC features across different image bands of IRS L3 or Landsat OLI data	PD	15
	Supervised image classification, class editing, and post-classification analysis	PD	15
	Digitisation of features and administrative boundaries. Data attachment, overlay, and preparation of annotated thematic maps	PD	20
DSE-A2 Climate Change: Vulnerability and Adaptations	Waypoint collection from GNSS receivers and exporting to GIS database.	PD	10
	The science of climate change: Origin, scope and trends.	PG	5
	Climate change with	PG	6
(Theory)	Evidences and factors of climate change: The nature—man dichotomy.	PG	4
	Greenhouse gases and global warming.	PD	5

	Electromagnetic spectrum, atmospheric window, heat balance of the earth.	KB	5
	Global climatic assessment: IPCC reports.	SN	5
	Climate change and vulnerability: Physical; economic and social.	PG	5
	Impact of climate change: Agriculture and water; flora and fauna; human health and morbidity.	PD	5
	Global initiatives to climate change mitigation: Kyoto Protocol, carbon trading, clean development mechanism, COP, climate fund.	SN	5
	Climate change vulnerability assessment and adaptive strategies with particular reference to South Asia	KB	5
	National Action Plan on climate change.	KB	5
	Role of urban local bodies, panchayats, and educational institutions on climate change mitigation: Awareness and action programmes.	KB	5
DSE-A2 Climate Change: Vulnerability and	Analysis of trends of temperatures (maximum and minimum of about three decades) of any India Meteorological Department (IMD) station.	SN	10

Ada	ptations	Comparative analysis of	SN	15
	Lab	seasonal variability of rainfall		
(Pı	ractical)	on the basis of monthly data		
	,	of any two IMD stations.		
		Annual rainfall variability of	SN	15
		about three decades for any		
		two representative climatic		
		regions of India.		
		Preparation of an inventory of	PG	20
		extreme climatic events and	10	20
		mitigation measure of any

LESSON PLAN (MORNING)

Semester	Programme	Course and Name of the Paper	Topic	Teacher	No. Of hours
1	GENERAL	CC 1/GE 1 THEORY	GEOTECTONICS	ALOKA MUKHOPADHYAY	16
			GEOMORPHOLOGY	ALOKA MUKHOPADHYAY	21
			HYDROLOGY	ALOKA MUKHOPADHYAY	10
			OCEANOGRAPHY	ALOKA MUKHOPADHYAY	14
1	GENERAL	CC 1/ GE 1 PRACTICAL	PHYSICAL GEOGRAPHY LAB	ALOKA MUKHOPADHYAY & SMRITI DAS	60
2	GENERAL	CC-2/ GE2 THEORY	CLIMETOLOGY	ALOKA MUKHOPADHYAY	25
			SOIL GEOGRAPHY	ALOKA MUKHOPADHYAY	20
			BIOGEOGRAPHY	ALOKA MUKHOPADHYAY	15
2	GENERAL	CC-2/ GE2 PRACTICAL	ENVIRONMENTAL GEOGRAPHY	ALOKA MUKHOPADHYAY & SMRITI DAS	60
		CC-3 THEORY	ECONOMIC GEOGRAPHY	ALOKA MUKHOPADHYAY	20
	GENERAL		SOCIAL GEOGRAPHY	ALOKA MUKHOPADHYAY	21
			CULTURAL GEOGRAPHY	ALOKA MUKHOPADHYAY	20
3	GENERAL	CC 3 PRACTICAL	HUMAN GEOGRAPHY	ALOKA MUKHOPADHYAY & SMRITI DAS	60
3	GENERAL	CC 3 SEC A2	FOREST &WILDLIFE MANAGEMENT	ALOKA MUKHOPADHYAY	30
4	GENERAL	CC 4 THEORY	SCALE &PROJECTION	ALOKA MUKHOPADHYAY	14
			TOPOGRAPHIC & THEMATIC MAPS	ALOKA MUKHOPADHYAY	17
			REMOTE SENCING &GEOGRAPHICAL INFORMATION SYSTEM	ALOKA MUKHOPADHYAY	21

			SURVEYING	ALOKA MUKHOPADHYAY	12
4	GENERAL	CC 4 PRACTICAL	CARTOGRAPHY	ALOKA MUKHOPADHYAY & SMRITI DAS	60
	GENERAL	CC-4 SECB2	SUSTAINABLE DEVELOPMENT	ALOKA MUKHOPADHYAY	30

Semester	Programme	Course and Name of the Paper	Topic	Teacher	No. Of hours
